Daffodil

Hermani

Multiple-Flowered

Giants

Now, for the first time, Max Schling offers a new strain of Narcissi combining boldness and gracefulness with stems averaging three flowers to a cluster, each bloom averaging 2 to 3 inches in diameter.

A planting of these bulbs creates a triple effect, each stem being the equivalent of three stems, and there are many bulbs that will have two stems each. New garden effects can be obtained by the liberal use of this new strain, and startling cut flower arrangements are possible with the splendid cluster effect.

Our Famous

Rarity Collection of Narcissi and Daffodils Can You Use?

Order Early to Avoid Disappointment
See Page 9

Our Rarity Collection of Daffodils and Narcissi has become so popular that original purchasers of this collection have become "spoiled" for other varieties.

Because of the tremendous demand for this collection, and the countless testimonials we have received from those who have already been enchanted by these outstanding varieties, we are again featuring this offer, although we do suggest that careful consideration be given the outstanding varieties offered in our Exhibition and Connoisseur Collections.

To those who have not already grown our Rarity Collection we can only say that there is no finer Daffodil value offered in the entire horticultural world.

MAX SCHLING SPECIALTIES

The breath-taking beauty and enormous but gracious size of this gorgeous Daffodil appearing on the cover is too difficult to describe. For actual size measure the flowers in the color illustration with a rule.

We are happy to report that the performance of this variety in our trial gardens was so outstanding that a popular favorite such as **King Alfred** seemed to be outclassed by its performance.

Fortunately, however, **King Alfred** is at least a week earlier to bloom, and, therefore, we will not claim that **Babylon Majestic** will supplant that ever-popular variety, but in reality **Babylon Majestic** will extend the enjoyment period for those who love huge butter-yellow Daffodils.

We still recommend **King Alfred** as the best **forcing** variety because of its earliness.

Daffodil **Babylon Majestic**

PESTEX **SUPER FREESIAS** **Eastern Giant** **Strain**

A remarkable preparation that will positively repel all forms of moles, field mice and other rodents that are destructive to bulbs. **60¢ per lb.; 10 lbs., \$4.50, postpaid.** 1 lb. sufficient for treatment of 200 bulbs. Absolutely harmless to plant life.

This strain represents a quality of Freesia never offered before. It is a vigorous growing strain producing flowers that resemble miniature Lilies in size, with an exquisite Freesia fragrance all their own.

AMARYLLIS

Schling's famous Sequoia strain. A lasting bulbous plant that should be in every home as it is deserving of the greatest popularity.

See our listing of a famous private estate collection.

AS THIS CATALOG goes to press the Dutch bulb situation is in a turmoil. Hollanders in this country who represent bulb growing firms in Holland, and who have relatives and business associates abroad, are no more certain of the situation than we, who have to depend on cabled reports for our information.

We feel that a goodly percentage of Holland-grown bulbs will be available this year. That is why we are printing this complete catalog. If the bulbs do not materialize we will have many fine varieties of American-grown Tulips, Crocus and Hyacinths to offer. The situation does not affect the supply of Daffodils, Iris, many Spring Harbingers, and any of the home forcing bulbs.

Place your bulb orders with us in confidence for if we cannot fill it in full, information to that effect will be immediately forthcoming.

Reserve the most treasured corner of your garden for some of Max Schling's bulbs.

Prices subject to revision.

RARITY *Collection* of NARCISSUS and DAFFODILS

This outstandingly beautiful collection of Daffodils and Narcissus, illustrated on our second cover page, is worthy of consideration by all garden lovers. The connoisseur will delight in being able to purchase these selected and outstanding varieties at a nominal price, whereas the gardener who appreciates beauty for beauty's sake is enabled to obtain these "out of reach" varieties at practically the cost of ordinary varieties.

Two years ago the cost of the entire collection of three each would not have bought four bulbs of the variety Lord Wellington alone. Our supply of these varieties, while sufficiently ample, will definitely not last through the season. Place your order early to insure delivery.

The OUTSTANDING NOVELTY

Narcissi Hermani NORMANDY

Pictured on front cover.

In accordance with our policy of introducing a new variety each year we offer with pride an entirely new member of the race of Daffodils—"Normandy," an outstanding new form of Narcissi.

Each floret is as large as a Barri or Incomparabilis type, and the flowers are borne in clusters of three. One does not have to be a fancier to appreciate the beauty and practicality of this variety for garden effects and startling cut flower arrangements.

Another noteworthy feature of this variety is its late bloom, extending the enjoyment of the Narcissus display well into spring.

Price: \$1.00 each; \$11.00 per doz.

Daffodil, Babylon Majestic

Max Schling Introduction, 1944

Since its introduction last year, we have had reams of testimonials as to its colossal beauty.

A single flower won the prize as best flower in the New York Horticultural Society Show for 1945.

This super Daffodil can be planted in addition to King Alfred, extending the enjoyment period of Daffodils for at least ten days.

Price: \$1.00 each; \$11.00 per doz.

TERMS OF SALE

We, Max Schling Seedsmen, Inc., give no warranty, express or implied, as to the productiveness of any seeds or bulbs we sell, and will not be in any way responsible for the crop. The prices in this catalog supersede all previous offers.

AMERICAN and DUTCH GROWN TULIP BULBS

In view of the excellent results obtained from American grown Tulips since 1939, we are loathe to put all our eggs in the Holland basket. It is true that the renewed importation of Tulip bulbs will increase our range of colors and varieties, but as to quality there is no difference. Good bulbs are good bulbs whether they are grown on this continent or imported, and the same too is true for low quality bulbs.

Double Narcissus

Schling's Famous OREGON TRAIL MIXTURE

NARCISSI and DAFFODILS FOR NATURALIZING

"A Long-Time Investment in Beauty"

We consider our Oregon Trail Mixture of Daffodils and Narcissi for naturalizing as the most outstanding item that we have ever offered in the line of spring flowering bulbs.

We instituted the sale of this mixture over 25 years ago, and each year represents a distinct improvement in the blending and quality of the bulbs. Today it consists of 100 per cent American-Grown bulbs from American-Grown parent stock grown in the Pacific Northwest, which region is acknowledged as the best Daffodil growing region in the whole world.

Each variety found in this mixture is in itself a splendid addition to any garden, and while naturalizing these bulbs under trees and in meadows is ideal, we do not hesitate in recommending them for garden use.

An outstanding fact concerning this mixture is the fact that we have been able to maintain its quality and excellence at no appreciable advance in price over what it was sold for five years ago. We doubt whether this price will ever be lowered within the next decade.

PRICE:

50 for \$3.65; \$7.00 per 100; \$65.00 per 1000; \$120.00 per 2000

Paper-White and Soleil d'Or Narcissi for indoor growing are offered on page 15.

Famous Imported HYACINTHS!

SUBJECT TO IMPORTATIONS—If unavailable, immediate refunds will be made

We welcome Dutch Hyacinths back mainly because we have never been able to fill the demand for our English and American-grown bulbs. These are fully aged and matured, equally suited for forcing as for outdoor planting. Quantities are limited.

JUMBO EXHIBITION SIZE. Giant forcing size either singly or in pans. This size makes tremendous heads, and when planted outdoors they are colossal. **Each 55c; \$5.50 per doz.; \$40.00 per 100.**

FORCING SIZE. Used mainly for forcing three or more in a pan, but are quite satisfactory for single pots as well. Impressive in outdoor beds. **3 for \$1.00; \$3.75 per doz.; \$27.50 per 100.**

HEAVY BEDDING SIZE. Still large enough to force well; this size is ideal for outdoor planting in beds and masses. **\$2.00 per doz.; \$15.00 per 100.**

City of Haarlem. Yellow.

Gertrude. Large trusses; dark pink.

Grand Maitre. Rich porcelain-blue.

King of the Blues. Deep navy blue.

La Grandesse. Late flowering pure white.

Lady Derby. Lovely pale pink.

La Victoire. Deep pink, almost red. Available in forcing and bedding sizes only.

L'Innocence. Very early flowering pure white.

Marconi. Compact heads, deep pink. Available in bedding size only.

Perle Brilliant. Brilliant light blue. Available in exhibition and forcing sizes only.

Queen of the Blues. Clear light blue. Available in bedding size only.

Queen of the Pinks. Rich light pink. Available in bedding size only.

Queen of the Whites. Late, compact, pure white. Available in bedding size only.

TWO Wonderful Hyacinth Novelties

When first offered by us in 1943 from a limited stock of American-grown bulbs they were rapidly sold out. Since then we have been swamped with requests for these two new colors in Hyacinths.

Apricot Queen. Just picture an orange-apricot Hyacinth flower fading to a rich apricot-pink.

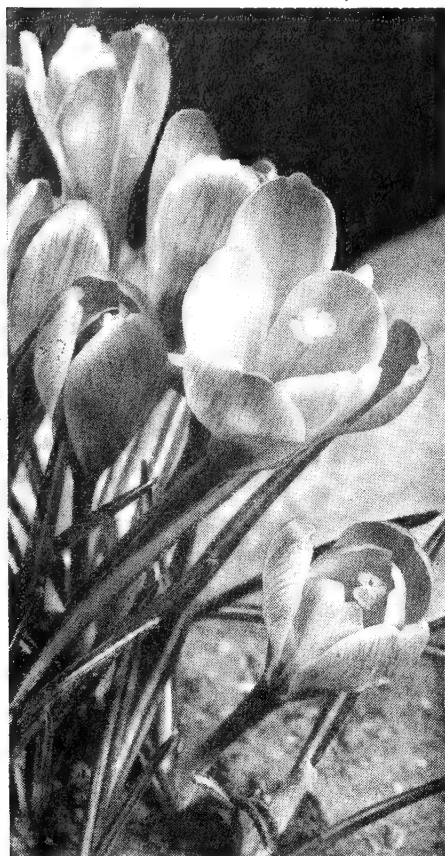

Scarlet Prince. A rich vivid brilliant scarlet. Really red.

PRICES OF BOTH VARIETIES:

Forcing size. 3 for \$1.85; \$7.00 per doz.; \$52.50 per 100.

Bedding size. 3 for \$1.45; \$5.50 per doz.; \$43.50 per 100.

Schling's SUPERB HARDY LILIES

* denotes choicest types for forcing.

All Lilies, with the exception of Madonna Lilies, are delivered in late October and early November. For those who are afraid that the ground may be frozen before this date, we recommend the following: Select the spot where the Lilies are to be planted; cover well with leaves, straw, salt hay, etc., to prevent the intrusion of frost. With this treatment it will be possible to plant Lily bulbs through November and December in the coldest climates.

MADONNA LILIES (Northern French Grown)

(*Lilium Candidum*)

Plant September 1st to November 1st.

These ever popular Lilies are once again available from France. The Northern type are absolutely hardy and disease free, and we are able to offer a wide divergence in sizes. The smallest size bulbs will produce beautifully.

Enchantress. Light pink.

PESTEX—The Mole Repellent

This great discovery has proven amazingly successful in repelling all destructive and bulb-loving rodents such as moles, field mice, squirrels, chipmunks, etc.

Dust your bulbs thoroughly before planting. One pound is sufficient to treat 100 Tulip bulbs or more and leave enough over to mix in the soil in order to make your bulb beds absolutely "pest-proof." This product is non-poisonous and absolutely harmless to bulbs, roots and foliage.

Price: 60c per lb.; \$4.50 per 10 lbs., postpaid.

PLATYCODON, Single. Blue, White and Pink.

Some Favorites for the Food Garden

We offer here a few important items for the food garden that we consider as best planted in the fall. Fall planting enables the plant stock to become established so that no time is lost in spring transplanting. Inasmuch as all of these items are very hardy, loss from winter-killing is negligible, and should not be considered.

Asparagus, Mary Washington

Rust-resistant. Ready for delivery late September. Gain a whole year on your Asparagus bed by planting this fall. **Complete cultural circular sent on request.** \$5.35 per 100, postpaid.

Egyptian or Top Onion Sets (Hardy)

Egyptian Onion Sets are planted to produce very early Spring Onions and Scallions. These sets are perfectly hardy in practically every section, and can be planted throughout the entire fall. They remain in the ground with practically no protection, and produce tender and tasty green Onions early in the spring. Price: 50c per quart, postpaid.

BERRY PLANTS

All the finest varieties in the following:

Raspberries:

Fruiting size regular bearing varieties. \$5.60 per 10; \$49.50 per 100.

Fruiting size everbearing varieties. \$6.50 per 10; \$60.00 per 100.

Blackberries. \$5.60 per 10; \$49.50 per 100.

Everbearing Strawberries: Mastodon and Gem. 25 for \$5.00; \$16.00 per 100.

TWO WONDERFUL NEW RHUBARB VARIETIES

Chipman's Canada Red. The newest and finest Rhubarb. Very sweet and tender; of the finest flavor with extra large stalks. Bright red all the way through, the red color extending even to the mid-rib of the leaf. This variety retains its beautiful color in cooking, and both sauce and pies are an appetizing cherry-red color. This variety definitely does not go to seed during the summer, and, therefore, can be used throughout the entire summer. **Supply very limited.** Price: \$1.25 each; 5 for \$5.50, postpaid.

MacDonald. Stalks are tender, of unsurpassed flavor, and of a bright crimson. When cooked, the color is a beautiful shade of pink. High yield, strong and robust. MacDonald can be used all summer. Strong roots, 80c each; \$9.40 per doz., postpaid.

In our opinion these two varieties of Rhubarb preclude the necessity of planting any of the older varieties. We are discontinuing the listing of all older varieties in favor of these two which we consider the greatest advance in this line. Rhubarb should be planted four feet apart, and the crowns set so that they are covered 2 inches below the surface.

Schling's Selected Peonies

It is a known fact that the only time to plant Peonies for really good results the first year is in the autumn. It is advisable to cover the top eyes of these strong roots no more than two inches. Protection is rarely necessary, and, if used, should consist only of such covering as salt hay, leaves, or SANI-SOIL.

Schling's Maxima Grass Seed Mixtures

A grass seed mixture may be offered under any brand name. However, regardless of the name, the basis of all good grass seed mixtures must necessarily be the same. The important feature of a good mixture is that it contains heavy, plump seeds from selected grass stocks that have been grown for the distinct purpose of seed production. Careful blending pays its part in the compounding of a high class grass seed mixture. We have prided ourselves upon the super-quality of our grass seed mixtures which have established a reputation in the past 25 years.

COMPARE THESE FORMULAE WITH ANY GRASS SEED MIXTURE OFFERED

When you buy Schling's Maxima Mixtures you buy all live grass seed made up of the finest hardest grasses.

Fall sowing of grass seed insures an established lawn for next season. These are the lawns that usually remain green through the hot and dry summer due to the fact that their root system has had a chance to develop through the cool days of autumn and early spring.

Wild White Clover

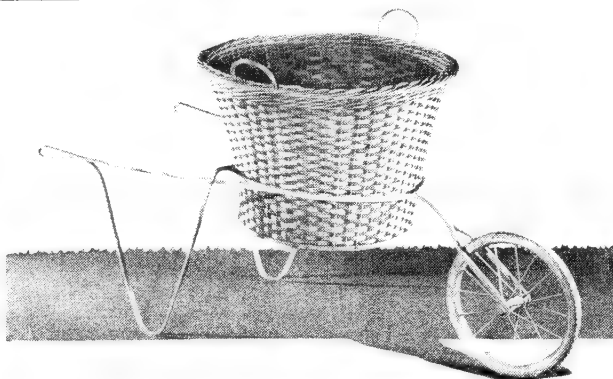

A comparatively recent introduction of this strain of Clover. It is very vigorous and of a thick, dwarf growth. An important feature is its lack of flowers which is a great advantage in maintaining a green lawn. Wild White Clover is more vigorous than any weed, and because of its all around excellence we recommend its use in the finest lawns whereas in the past we have never recommended the use of ordinary Dutch White Clover except for specific purposes. 1 pound is sufficient for 800 square feet. 1 lb., \$3.00; 5 lbs., \$14.00.

Schling's Bulb Fiber

Especially prepared bulb fiber that has been improved by the addition of various essential minerals for the successful growing of bulbous flowers. This material enables one to plant bulbs in decorative bowls without drainage, thereby enhancing the beauty of the entire arrangement. It is treated to prevent stagnation and putrefaction and never gives off an offensive odor. Such bulbs as Amaryllis, Roman Hyacinths, Paper-White Narcissi, Freesias, Calla Lilies, in fact, all bulbs that can be grown in the home thrive exceedingly well in this preparation. 25c per quart; 75c for 4 quarts; \$1.35 per peck.

Bulbs are Delivered Free in Second Postal Zone Only

All bulbs offered in this catalog, with the exception of fleshy rooted kinds such as Iris, Peonies, etc., are postpaid within the limits of the second postal zone of New York City only. When placing orders from outside this zone it will be wise to add a reasonable amount of postage in order to forestall minimum express charge of 35c. Any remittance in excess of postal charges will be promptly refunded.

Our famous Brouette is available once again. For years the Max Schling Brouette, "wheelbarrow gone sporting" was the most sought after item that we ever handled. The war necessarily made it impossible to manufacture until very recently, and we are very glad to announce that we are once more able to supply this invaluable item. Easy enough for a child to handle, the frame is made of strong steel, extremely light in weight, mounted on a rubber tired carriage wheel, the bushel basket is removable. Price \$7.50 each, express collect.

Please do not enclose cash in any form whatever. We disclaim all responsibility for lost cash remittances.

BULB SUPPLIES FOR 1945

Since 1940 the slogan, "American Grown Bulbs for American Gardens," has been uppermost, for when foreign sources of supply were cut off it was feared by many people that there would be no more Tulips for American gardens.

We undertook to dispel these fears almost immediately, and since 1940 we have offered and sold tremendous quantities of American grown Tulips that have proven their all-around excellence. We will continue to offer American grown Tulips until such time when Holland importations will reach pre-war proportions.

IMPORTED BULBS

We are glad to be able to list imported bulbs again. As we go to press we do not know how much stock will be available, but we do know that it will reach a sizeable amount.

Be assured that our Holland and French grown bulbs are supplied by the most meticulous and responsible growers and collectors in Europe. There is a wide variation of quality in bulb stock, and for that reason we are proud that the name of Max Schling has been synonymous with quality for over a quarter of a century.

BULBS FOR HOME GROWING

The advantages and beauty of bulbs grown in the home during the long winter season have but recently been recommended.

In the past many flower lovers were content to grow Paper-White Narcissi and an occasional pot of Lily-of-the-Valley, never daring to attempt some of the lesser known but more alluring bulbous plants.

We offer for your consideration a list of bulbs that can be planted with every assurance of complete success in the home.

- Amaryllis, Sequoia**
- Hybrids**
- Calla Lilies, White**
- Calla Lilies, Yellow**
- Freesias** For bright rooms and temperature not over 60 degrees.
- French White Roman**
- Hycinchths**
- Lachenalia**
- Veltheimia**

The above list can be regarded as almost fool proof, but we, of course, suggest that any of the other items appearing in our Indoor Bulb Section should be attempted, for with a modicum of care and understanding very satisfactory results can be obtained.
